Advances in Vision Disorders: Causes and Epidemiology

Message from the Guest Editor

Vision disorders are a major public health issue that endanger human health and quality of life. Globally, diseases such as uncorrected refractive error, cataract, glaucoma, age-related macular degeneration, diabetic retinopathy and other retinopathies caused by systemic diseases, are important causes of vision disorders, and are the key direction for clinical and research work in ophthalmology. Epidemiological investigations and clinical research into the etiology of these diseases provide important clinical evidence and a theoretical basis for better solutions to vision disorders, and thus are the focus of this Special Issue. The *Journal of Clinical Medicine* (Impact Factor = 4.241, cited on PubMed) is currently running a Special Issue entitled: "Advances in Vision Disorders: Causes and Epidemiology". Based on your expertise in this field, we think you could make an excellent contribution to this Special Issue. We would appreciate it if you were to submit an original research article or review article on any aspect related to the theme.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi
