New Perspectives on Cardiovascular Disease: Women's Treatment and Management

Message from the Guest Editors

CVD remains a leading cause of morbidity and mortality in women, despite the overall reduction in age-adjusted CVD mortality in the past few years. Aside from the traditional risk factors, predictors of increased CVD risk in both sexes, there are also unique RFs in women, related to their reproductive and gynecological history. Moreover, among women, there is a lack of knowledge and perception of CVD. In comparison to men, women with CVD are typically underdiagnosed and undertreated. The problem is more significant among women due to the incorrect and ingrained belief that CVD is primarily, if not exclusively, a male disease. This misunderstanding is generated by the differences in the clinical presentation of CVD in the two sexes, and by the increased prevalence of advanced postmenopausal age among women. The aim of this Special Issue is to gather new data on peculiar features of CVD and risk factors in women, in order to reduce the underestimation of CVD risk, and to find strategies that are for prevention, management and therapy that is tailor made to the specific woman's needs. Cutting-edge research (original article and reviews, etc.) are welcome.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
