

Special Issue

Cloud Security and Privacy

Message from the Guest Editors

Cloud computing is a cost-effective way of provisioning infrastructure and software, but challenges related to privacy and security still trouble many potential users and keep cloud computing from reaching its true potential. This Special Issue aims to publish novel approaches to security and privacy in the cloud. Suggested topics include, but are not limited to:

- Securing Machine Learning in the cloud;
- Trusted execution and confidential computing;
- Virtual machine and container security;
- Cloud accountability and auditing;
- Cloud authentication and authorization;
- Blockchain cloud services;
- Cryptography in the cloud;
- Hypervisor security;
- Cloud identity management and security as a service;
- The prevention of data loss or leakage;
- Secure, interoperable identity management;
- Cloud trust and credential management;
- Trust models for cloud services;
- Usable security risk management in the cloud.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Danda B. Rawat

Department of Electrical Engineering and Computer Science, Howard
University, Washington, DC 20059, USA

Author Benefits

High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO,
and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 21.5 days after
submission; acceptance to publication is undertaken in 4.8
days (median values for papers published in this journal in
the second half of 2025).

Journal Rank:

CiteScore - Q1 (Computer Science (miscellaneous))
