

Special Issue

Editorial Board Members' Collection Series: Electrochemical Composites

Message from the Guest Editors

Electrochemical composites, which contain a diverse array of materials (e.g., conductive polymers, carbon-based nanostructures, and metal oxides), are pivotal in advancing energy storage, conversion, and sensing technologies. Their tailored architectures enhance charge transfer, stability, and catalytic activity, addressing global challenges in sustainable energy and environmental remediation. We are pleased to invite researchers to contribute to our Special Issue, which aims to highlight breakthroughs in this dynamic field.

This Special Issue aims to showcase cutting-edge advancements in the design, synthesis, and application of electrochemical composites, aligning with the journal's focus on materials science and energy technologies. By fostering interdisciplinary collaboration, we seek to accelerate innovations for next-generation devices (e.g., batteries, supercapacitors, electrocatalysts). We look forward to receiving your contributions.

Guest Editors

Dr. Patrizia Bocchetta

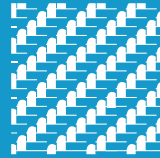

Department of Innovation Engineering, University of Salento, Edificio La Stecca, 73100 Lecce, Italy

Dr. Xiangbo Meng

Department of Mechanical Engineering, University of Arkansas, Fayetteville, AR 72701, USA

Deadline for manuscript submissions

31 December 2026

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Dr. Francesco Tornabene
Department of Innovation Engineering, University of Salento, 73100
Lecce, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Materials Science, Composites) / CiteScore - Q1 (Engineering (miscellaneous))
