

Special Issue

Advanced Composite Materials and Design for Structural Safety and Sustainability

Message from the Guest Editors

This Special Issue aims to showcase cutting-edge advancements and innovative research in theoretical and experimental methodologies pertaining to material development, specifically focusing on structural integrity and sustainability. Topics of interest for this Special Issue include, but are not limited to, the following:

- High-performance materials;
- Resilience and sustainability;
- Civil and structural engineering;
- Structural rehabilitation;
- Retrofitting and strengthening;
- Eco-materials for civil engineering;
- Concrete structures;
- Composite materials and structures;
- Structural safety;
- Environmentally friendly construction, structural analysis and design;
- Seismic engineering;
- Reliability and durability of structures.

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Materials Science, Composites) / CiteScore - Q1 (Engineering (miscellaneous))
