

Special Issue

Advancements in Sustainable Cement-Based Composites: Innovations in Performance, Durability, and Environmental Impact

Message from the Guest Editors

This Special Issue aims to present cutting-edge research in cementitious materials, with a particular focus on sustainability and innovation. We seek contributions that explore advancements in material design, production techniques, and performance optimization, as well as the real-world applications of sustainable cement-based composites. The scope aligns with the mission of the journal, addressing both fundamental research and practical solutions that advance the performance, durability, and environmental responsibility of cementitious materials. This Special Issue is expected to provide valuable insights for researchers, engineers, and practitioners in materials science, civil engineering, and sustainability. We aim to gather at least 10 articles for this Special Issue, which may be published in book form if this number is reached.

Guest Editors

Dr. Gregor Kravanja

Laboratory for Separation Processes and Product Design, Faculty of Chemistry and Chemical Engineering, University of Maribor, Smetanova ul. 17, 2000 Maribor, Slovenia

Dr. Natalija Bede Odorčić

Faculty of Civil Engineering, University of Rijeka, Rijeka, Croatia

Deadline for manuscript submissions

closed (31 January 2026)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Dr. Francesco Tornabene

Department of Innovation Engineering, University of Salento, 73100
Lecce, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid
by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec,
CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Materials Science, Composites) / CiteScore - Q1
(Engineering (miscellaneous))
