

## Special Issue

# Advanced Carbon Fiber Reinforced Composite Materials

### Message from the Guest Editor

This Special Issue of *Journal of Composites Science*, entitled “Advanced Carbon Fiber Reinforced Composite Materials”, focuses on advanced composite materials such as carbon fiber-reinforced plastics (CFRP), which have gained the attention of different industries, such as aerospace, automotive and motorsports industries, which produce lightweight and high-performance components. Advanced composite materials, primarily governed by the properties of reinforcing fibers such as high strength and high stiffness characteristics, are characterized by their high potential in terms of stiffness/weight ratio, making them very attractive for structural applications in which low weight and high stiffness conditions have to be met. The present Special Issue aims to collect contributions on the advanced carbon-fiber-reinforced composite materials, as well as to review the state-of-the-art on these materials. The manuscripts of this Issue will focus on the most significant and promising manufacturing technologies, machining and joining processes, modeling, simulation, material characterization and failure mechanisms.

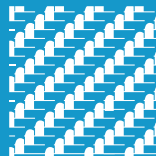

### Guest Editor

Prof. Michela Simoncini

Faculty of Engineering, Università eCampus, Via Isimbardi 10, 22060 Novedrate (CO), Italy

### Deadline for manuscript submissions

closed (31 January 2022)

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Dr. Francesco Tornabene  
Department of Innovation Engineering, University of Salento, 73100  
Lecce, Italy

---

#### Author Benefits

##### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

##### High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

##### Journal Rank:

JCR - Q2 (Materials Science, Composites) / CiteScore - Q1 (Engineering (miscellaneous))
