Special Issue

Bimetallic Composites for Oxidation and Reduction Catalysis

Message from the Guest Editors

In recent years, catalysts containing two or more metals have attracted great attention for different heterogeneous catalytic applications. Of various catalytic applications, oxidation and reduction are the two main processes in converting under-functionalized and over-functionalized starting materials in various fields, such as biomass valorization and fine chemical industry.

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Materials Science, Composites) / CiteScore - Q1 (Engineering (miscellaneous))
