

Special Issue

Dynamic Performance and Response of Composite Based Structures

Message from the Guest Editors

In perspective of optimizing transport systems making them increasingly sustainable, novel structural concepts should be introduced relying on a much more “composite thinking” philosophy. Looking at the new generation of means of transport (aerospace, naval, rail...) where the design requirements are becoming increasingly stringent, this Special Issue is intended to collect the most recent outcomes (case studies, models, formulations) as well as in-depth reviews on engineering strategies and interesting applications for the improvement of dynamic performance of the composite based structures including: acoustic, vibration, fatigue, impact strength properties and so on.

Guest Editors

Dr. Maurizio Arena

Engineering and Innovation Technology, Magnaghi Aerospace of MA Group Company, Via Galileo Ferraris 76, 80146 Napoli, NA, Italy

Prof. Dr. Massimo Viscardi

Department of Industrial Engineering, Aerospace Section University of Naples “Federico II”, 80125 Naples, Italy

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Dr. Francesco Tornabene

Department of Innovation Engineering, University of Salento, 73100
Lecce, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid
by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec,
CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Materials Science, Composites) / CiteScore - Q1
(Engineering (miscellaneous))
