

Special Issue

Nanocomposites for Supercapacitor Application

Message from the Guest Editor

Keeping eye on increasing trend in world energy consumption, someday the natural resources will bound to run out. Therefor it is necessary to establish a sustainable and innovative solutions to store energy. In recent years, nanocomposites made up off (Graphene/metal oxide & conducting polymer) have attracted a great deal of attention in energy storage and conversion devices. The performance of the devices strongly relies on the structure and properties of the component materials.

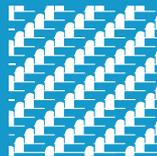

Guest Editor

Dr. Rajeeb Kumar Jena

School of Mechanical and Aerospace Engineering, Nanyang Technological University, Singapore, Singapore

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Dr. Francesco Tornabene

Department of Innovation Engineering, University of Salento, 73100
Lecce, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid
by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec,
CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Materials Science, Composites) / CiteScore - Q1
(Engineering (miscellaneous))
