

## Special Issue

# Opportunities for Composites in the Future Energy Systems

### Message from the Guest Editors

Composite materials are widely utilised and adopted for a range of applications in energy systems for residential, commercial and industrial purposes. For example, composite nanofluids are particularly used in the capture and storing of thermal sources such as solar energy, composite phase change materials are widely used for thermal management in buildings or battery technologies, composite materials are added at nano or micro levels to form blends in fuel energy systems and improve their combustion performance, sorption composite materials are employed to improve heating and cooling. The technological development of innovative composite materials is a driving force for the success of future energy systems in the domestic, industrial and transport sectors, providing services such as heating, cooling or electricity.

---

### Guest Editors

Dr. Yiji Lu

James Watt School of Engineering, University of Glasgow, Glasgow G12 8QQ, UK

Dr. Ke Tang

Mechanical and Energy Engineering, Southern University of Science and Technology, Shenzhen, China

---

### Deadline for manuscript submissions

closed (30 September 2021)

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Dr. Francesco Tornabene

Department of Innovation Engineering, University of Salento, 73100  
Lecce, Italy

---

#### Author Benefits

##### **Open Access:**

free for readers, with article processing charges (APC) paid  
by authors or their institutions.

##### **High Visibility:**

indexed within Scopus, ESCI (Web of Science), Inspec,  
CAPlus / SciFinder, and other databases.

##### **Journal Rank:**

JCR - Q2 (Materials Science, Composites) / CiteScore - Q1  
(Engineering (miscellaneous))
