

## Special Issue

# Optical–Electric–Magnetic Multifunctional Composite Materials

### Message from the Guest Editor

We are pleased to announce a Special Issue dedicated to "Optical–Electric–Magnetic Multifunctional Composite Materials". This Special Issue aims to showcase cutting-edge research and innovations in the design, synthesis, characterization, and application of composite materials that integrate optical, electrical, and magnetic functionalities. Such materials hold transformative potential for next-generation technologies, including optoelectronics, energy storage, sensing, and biomedical devices. Topics of interest include, but are not limited to, the following:

- Novel material architectures (e.g., hybrid nanostructures, layered composites).
- Synergistic coupling mechanisms between optical, electric, and magnetic properties.
- Advanced fabrication techniques (e.g., self-assembly, 3D printing).
- Theoretical modeling and computational insights into multifunctional behaviors.
- Applications in photovoltaics, spintronics, smart sensors, and electromagnetic shielding/absorption.

---

### Guest Editor

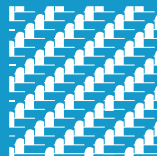

Dr. Jiaolong Liu

School of Physics, Xidian University, Xi'an 710071, China

---

### Deadline for manuscript submissions

31 October 2025

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Dr. Francesco Tornabene  
Department of Innovation Engineering, University of Salento, 73100  
Lecce, Italy

---

#### Author Benefits

##### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

##### High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

##### Journal Rank:

JCR - Q2 (Materials Science, Composites) / CiteScore - Q1 (Engineering (miscellaneous))
