Special Issue

Functional Additives for Bio-Based Advanced Composites

Message from the Guest Editor

The objective of this Special Issue is to provide an update on the recent research on cutting-edge high-performance biopolymer nanocomposites for the production of functional materials for consumer and advanced applications with improved properties, while exerting a noticeably smaller environmental impact, being sustainable, and being non-toxic when compared to non-bio-based materials. Original full-length papers and review articles that enhance the development of bionanocomposite materials will be included in this Special Issue. This will be a scholarly platform where academics may share their findings on various biocomposite materials, with nanoscale fillers, in engineering and biomedical applications, among other fields of study.

Guest Editor

Dr. Cristina Neves

Department of Materials Engineering and Ceramics, CICECO Aveiro Institute of Materials, University of Aveiro, Aveiro, Portugal

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Dr. Francesco Tornabene
Department of Innovation Engineering, University of Salento, 73100 Lecce, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Materials Science, Composites) / CiteScore - Q1 (Engineering (miscellaneous))
