

## Special Issue

# Hydrogel and Biomaterials

### Message from the Guest Editor

Tissue engineering holds great promise in regenerative medicine. Increasing evidence has shown that biomaterials have multiple abilities to stimulate cell behaviors and promote tissue regeneration. Hydrogels are emerging as one of the most promising alternative biomaterials for both soft and hard tissue regeneration. The critical properties of hydrogels can be designed and conveniently tuned by proper selection of the material and chemistry to be suitable for tissue engineering.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Dr. Francesco Tornabene

Department of Innovation Engineering, University of Salento, 73100  
Lecce, Italy

---

#### Author Benefits

##### Open Access:

free for readers, with article processing charges (APC) paid  
by authors or their institutions.

##### High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec,  
CAPlus / SciFinder, and other databases.

##### Journal Rank:

JCR - Q2 (Materials Science, Composites) / CiteScore - Q1  
(Engineering (miscellaneous))
