Special Issue

Hydrogel and Biomaterials

Message from the Guest Editor

Tissue engineering holds great promise in regenerative medicine. Increasing evidence has shown that biomaterials have multiple abilities to stimulate cell behaviors and promote tissue regeneration. Hydrogels are emerging as one of the most promising alternative biomaterials for both soft and hard tissue regeneration. The critical properties of hydrogels can be designed and conveniently tuned by proper selection of the material and chemistry to be suitable for tissue engineering.

Dr. Francesco Tornabene Department of Innovation Engineering, University of Salento, 73100 Lecce, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Materials Science, Composites) / CiteScore - Q1 (Engineering (miscellaneous))
