Lightweight Composites Materials: Sustainability and Applications

Message from the Guest Editors

ICREAM' 22 is one of the largest renewable energy and materials conferences in the region of Maghreb. The conference discusses major research issues in the specified fields of interest and their applications in the business markets, in technical and industrial areas, from resource assessment to market and policy developments, drawing on leading experiences worldwide. In addition, this meeting is dedicated to cutting-edge research that addresses the scientific needs of academic researchers, industrial and professionals to explore new horizons of knowledge on various topics in interlink between materials and energy applications fields. This Special Issue will publish selected papers from ICREAM' 22, which will be held 22-24 June in ENS Casablanca, Morocco. <https://icream-22.sciencesconf.org/resource/page/id/8>. We encourage contributions of significant and original works of lightweight composites materials and their applications.
