

Special Issue

Zebrafish—a Model System for Developmental Biology Study III

Message from the Guest Editor

We are pleased to announce the third edition of our Special Issue, *Zebrafish—A Model System for Developmental Biology Study III*, building on the success of previous editions. Zebrafish research began with George Streisinger's 1981 paper, establishing zebrafish as a genetic model. This was followed by pivotal developmental studies from Charles Kimmel and the groundbreaking genetic screens by Nüsslein-Volhard, Driever, and Fishman in 1996, which set the standard for zebrafish research. Zebrafish continue to drive key discoveries in developmental biology, helping to uncover genetic pathways and organ development mechanisms. We invite research papers and reviews that highlight recent advancements in zebrafish research. Join us in exploring the latest developments using this exceptional model organism.

About the Journal

Message from the Editor-in-Chief

The *Journal of Developmental Biology* (JDB) publishes original research papers and timely reviews. Our primary aim is to provide a platform for the publication of studies on the development of multicellular organisms efficiently and professionally; papers undergo a fast, yet thorough, peer-review process. JDB is an open access journal and accepted contributions are published immediately online, providing unlimited access to the scientific community and general public. We look forward to receiving your contribution to our journal and to working with fellow researchers.

Editor-in-Chief

Prof. Dr. Simon J. Conway

Herman B Wells Center for Pediatric Research, 1044 West Walnut Street, Indiana University School of Medicine, Indianapolis, IN 46202, USA

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 26.2 days after submission; acceptance to publication is undertaken in 5.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
