Hox Genes in Development: New Paradigms

Message from the Guest Editor

Hox genes are among the most fascinating developmental regulators, and their study continues to fuel the most important paradigms in biology. Work published over recent years with the Hox gene family have opened new areas of investigation at evolutionary, developmental and molecular levels. It is time to propose a Special Issue to update all these recent breakthrough discoveries. We would like to present an opportunity for “Hox aficionados” to take stock of this update on Hox gene research in this Special Issue of the *Journal of Developmental Biology*. All contributions regarding the regulation and function at all evo-devo levels are welcome. They can comprise research articles, reviews and new methods and approaches to study Hox gene and protein function, including mathematical modeling.

About the Journal

Message from the Editor-in-Chief

The *Journal of Developmental Biology* (JDB) publishes original research papers and timely reviews. Our primary aim is to provide a platform for the publication of studies on the development of multicellular organisms efficiently and professionally; papers undergo a fast, yet thorough, peer-review process. JDB is an open access journal and accepted contributions are published immediately online, providing unlimited access to the scientific community and general public. We look forward to receiving your contribution to our journal and to working with fellow researchers.

Editor-in-Chief

Prof. Dr. Simon J. Conway

Herman B Wells Center for Pediatric Research, 1044 West Walnut Street, Indiana University School of Medicine, Indianapolis, IN 46202, USA

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 26.2 days after submission; acceptance to publication is undertaken in 5.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
