The 15th Anniversary of *JFB*— Endodontic Biomaterials

Message from the Guest Editor

The year 2025 marks the 15th anniversary of the *Journal of Functional Biomaterials*, a peer-reviewed, open access journal containing research relevant to the field of materials for biomedical use. So far, *JFB* has published more than 1700 papers from more than 9000 authors. We appreciate each author, reviewer, and academic editor whose support has brought us to where we are today. To celebrate this significant milestone, we are publishing a Special Issue entitled “The 15th Anniversary of *JFB*—Endodontic Biomaterials”. Endodontics is currently going through one of the most exciting periods of knowledge expansion within the history of the discipline, especially in terms of the future clinical translation of scientific attainments, largely driven by new insights in pulp biology and biomaterial development. The aim of this Special Issue is to present the various aspects of biomaterials development and testing, from physicochemical evaluations to biological in vitro and in vivo assessments of performance, before their introduction to clinical use.

Guest Editor

Dr. João Miguel Marques dos Santos
Institute of Endodontics, Faculty of Medicine, University of Coimbra,
3000-075 Coimbra, Portugal

Deadline for manuscript submissions

closed (28 February 2026)

About the Journal

Message from the Editor-in-Chief

The biomaterials field is one of the largest and fastest growing research areas both in the scientific community and in the industrial one. Biomaterials are the result of collaborations between different disciplines: chemistry, medicine, pharmacology, engineering and biology. The objective of this collaboration is to lead to the implementation of new devices to restore form and human body functions. The mission of the *Journal of Functional Biomaterials (JFB)* is to focus attention on physico-chemical characteristics and their importance in the interactions between biomaterials and living tissues. *JFB* seeks to publish studies on the preparation, performance and use of biomaterials in biomedical devices, as well as regarding their behavior in physiological environments. We are pleased to welcome you as our authors.

Editor-in-Chief

Prof. Dr. Pankaj Vadgama
School of Engineering and Materials Science, Queen Mary University of London, London, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Ei Compendex, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Engineering, Biomedical) / CiteScore - Q2 (Biomedical Engineering)
