Special Issue

Biotechnological Approaches and Biomaterials for Enhanced Wound Healing

Message from the Guest Editors

This Special Issue is devoted to state-of-the-art biotechnological approaches and biomaterials for wound healing. Such biotechnological approaches include materials and methods that enhance wound healing (including therapeutic, diagnostic, and clinical procedures) in organs and tissues. We warmly welcome the submission of manuscripts on the topic of the "Biotechnological Approaches and Biomaterials For Enhanced Wound Healing" Special Issue.
Prof. Dr. Bing Hu

Guest Editors

Dr. John G. Hardy

About the Journal

Message from the Editor-in-Chief

The biomaterials field is one of the largest and fastest growing research areas both in the scientific community and in the industrial one. Biomaterials are the result of collaborations between different disciplines: chemistry, medicine, pharmacology, engineering and biology. The objective of this collaboration is to lead to the implementation of new devices to restore form and human body functions. The mission of the *Journal of Functional Biomaterials* (*JFB*) is to focus attention on physico-chemical characteristics and their importance in the interactions between biomaterials and living tissues. *JFB* seeks to publish studies on the preparation, performance and use of biomaterials in biomedical devices, as well as regarding their behavior in physiological environments. We are pleased to welcome you as our authors.

Editor-in-Chief

Prof. Dr. Pankaj Vadgama
School of Engineering and Materials Science, Queen Mary University of London, London, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Engineering, Biomedical) / CiteScore - Q2 (Biomedical Engineering)
