# **Special Issue**

# Physiological and Biomechanical Foundations of Strength Training

# Message from the Guest Editor

The Special Issue entitled "Physiological and Biomechanical Foundations of Strength Training" aims to explore the intricate mechanisms underlying strength development, emphasizing the integration of physiological and biomechanical principles in training methodologies. This issue seeks to advance the scientific understanding of how various factors—ranging from muscle architecture and neuromuscular function to biomechanics and applied training strategies—contribute to optimizing strength performance. We encourage interdisciplinary perspectives that bridge gaps between research and practical application in athletic performance, rehabilitation, and health promotion.

# **About the Journal**

# Message from the Editor-in-Chief

## Editor-in-Chief

# Prof. Dr. Giuseppe Musumeci

Department of Biomedical and Biotechnological Sciences, Anatomy, Histology and Movement Sciences Section, School of Medicine, University of Catania, 95123 Catania, Italy

# **Author Benefits**

# **High Visibility:**

indexed within ESCI (Web of Science), Scopus, PubMed, PMC, FSTA, and other databases.

# Journal Rank:

JCR - Q2 (Sport Sciences) / CiteScore - Q2 (Physical Therapy, Sports Therapy and Rehabilitation)

# **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 26.9 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
