

Special Issue

Sports Medicine and Public Health

Message from the Guest Editors

We are all aware of the benefits of physical activity in preventing any pathologies and/or slowing down the progression of disease. The combination of sports medicine and innovative exercise protocols aims to optimize overall management and well-being for special populations affected by various pathologies. The application of modern technologies could help to create specific and useful training protocols to facilitate physical activity proposed for fragile populations and encourage medium–long-term adaptations and active lifestyles. This Special Issue of the JFMK aims to cultivate a multidisciplinary dialogue centered around current scientific insights in this field. We invite authors to contribute by submitting original research or targeted reviews, with the goal of advancing the comprehension of the management of physical activity in adult populations and its benefits, with positive repercussions on public health.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Giuseppe Musumeci
Department of Biomedical and Biotechnological Sciences, Anatomy,
Histology and Movement Sciences Section, School of Medicine,
University of Catania, 95123 Catania, Italy

Author Benefits

High Visibility:

indexed within ESCI (Web of Science), Scopus, PubMed,
PMC, FSTA, and other databases.

Journal Rank:

JCR - Q2 (Sport Sciences) / CiteScore - Q2 (Physical
Therapy, Sports Therapy and Rehabilitation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 22.5 days after
submission; acceptance to publication is undertaken in 2.4
days (median values for papers published in this journal in
the second half of 2025).
