

Special Issue

Innovations in Monitoring Athlete Health

Message from the Guest Editor

In recent years, advancements in health monitoring technologies have significantly transformed the way athlete health is assessed, managed, and optimized. This Special Issue, "Innovations in Monitoring Athlete Health", aims to explore the latest technological innovations, methodologies, and applications in athlete health monitoring. The Special Issue will cover topics such as wearable sensors, real-time health analytics, imaging, personalized training insights, and injury prevention tools. By bringing together leading research and practical applications, the Special Issue seeks to highlight how these emerging innovations are enhancing athletic performance while prioritizing health and safety. Contributions that address interdisciplinary approaches, data-driven insights, and real-world implementations are particularly encouraged, as they offer critical perspectives on the future of sports health monitoring. We invite researchers, practitioners, and industry professionals to submit their work to contribute to this dynamic and rapidly evolving field.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Giuseppe Musumeci

Department of Biomedical and Biotechnological Sciences, Anatomy,
Histology and Movement Sciences Section, School of Medicine,
University of Catania, 95123 Catania, Italy

Author Benefits

High Visibility:

indexed within ESCI (Web of Science), Scopus, PubMed,
PMC, FSTA, and other databases.

Journal Rank:

JCR - Q2 (Sport Sciences) / CiteScore - Q2 (Physical
Therapy, Sports Therapy and Rehabilitation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 26.9 days after
submission; acceptance to publication is undertaken in 1.9
days (median values for papers published in this journal in
the first half of 2025).
