

Special Issue

Exercise Evaluation and Prescription

Message from the Guest Editors

Dear colleagues, This Special Issue will focus on exercise evaluation and prescription, aiming to attract papers related to how to use either laboratory or field evaluations to generate training advice. Training might seem related mostly to athletes, but normal people (and patients) need specific advice as much as the athletes. We suspect that there are a number of strategies available that will allow the generation of quantitatively specific training advice that is appropriate for individuals within the “exercise universe.” Authors are invited to submit papers focusing on exercise evaluation and prescription on patients, healthy people, and athletes, based on findings observed in laboratory or field evaluation.

Author Benefits

High Visibility:

indexed within ESCI (Web of Science), Scopus, PubMed,
PMC, FSTA, and other databases.

Journal Rank:

JCR - Q2 (Sport Sciences) / CiteScore - Q2 (Physical
Therapy, Sports Therapy and Rehabilitation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 26.9 days after
submission; acceptance to publication is undertaken in 1.9
days (median values for papers published in this journal in
the first half of 2025).
