Advances in Rehabilitation and Injury Management

Message from the Collection Editor

This Topical Collection—*Advances in Rehabilitation and Injury Management*—welcomes translational studies including new advancements in injury management. We emphasize studies that link biomechanical insights with clinically meaningful outcomes, return-to-play criteria, and early diagnosis. Studies on populations often under-represented in research, such as women, youth, and the elderly, are particularly welcome, alongside sport-specific, evidence-based designs. As , we invite contributions that pair methodological rigor with practical guidance to advance prevention, rehabilitation, and injury management.
