

Special Issue

Movement Analysis in Sports and Physical Therapy

Message from the Guest Editor

Assessment procedures are essential in sports science and physical therapy, serving as a foundation for effective training prescription, injury prevention, and rehabilitation monitoring. However, there is a relative shortage of scientific focus on the specific measurement and evaluation methods used in these fields. This Special Issue seeks to address that gap by providing a platform for research emphasizing the importance of assessment methodologies in both sports and physical therapy.

A key focus is the reliability and validity of assessment techniques. These aspects ensure that the measurements used are both accurate and reproducible, providing actionable data that informs training and therapeutic decisions. Contributions exploring these qualities in current or novel assessment methods are encouraged.

Submissions are invited on a variety of topics related to assessment in sports and physical therapy, including but not limited to:

Reliability and Validity Studies.

Technological Innovations in Assessment.

Assessment in Training Prescription.

Assessment in Injury Prevention.

Assessment in Rehabilitation Progress.

Guest Editor

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Giuseppe Musumeci

Department of Biomedical and Biotechnological Sciences, Anatomy,
Histology and Movement Sciences Section, School of Medicine,
University of Catania, 95123 Catania, Italy

Author Benefits

High Visibility:

indexed within ESCI (Web of Science), Scopus, PubMed,
PMC, FSTA, and other databases.

Journal Rank:

JCR - Q2 (Sport Sciences) / CiteScore - Q2 (Physical
Therapy, Sports Therapy and Rehabilitation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 26.9 days after
submission; acceptance to publication is undertaken in 1.9
days (median values for papers published in this journal in
the first half of 2025).
