TMJ Dysfunctions and Systemic Correlations

Message from the Guest Editor

The purpose of this Special Issue is to promote knowledge and the correlation between the temporomandibular joint and all of the postural dysfunctions or those affecting the spine. Many occlusal correlations in recent years have been found to be responsible for the alterations affecting the posture of our patients, or for the musculoskeletal pain in other districts. Inter-specific orthopedic–orthodontic treatment, in some cases, has been proven to be effective in resolving these situations. Everything related to functional dental orthopedic therapy, TMJ surgical therapy, and more clinical or other information about these correlations, is the subject of the Special Issue.

Guest Editor

Prof. Dr. Luca Fiorillo

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Giuseppe Musumeci

Department of Biomedical and Biotechnological Sciences, Anatomy,
Histology and Movement Sciences Section, School of Medicine,
University of Catania, 95123 Catania, Italy

Author Benefits

High Visibility:

indexed within ESCI (Web of Science), Scopus, PubMed,
PMC, FSTA, and other databases.

Journal Rank:

JCR - Q2 (Sport Sciences) / CiteScore - Q2 (Physical
Therapy, Sports Therapy and Rehabilitation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 26.9 days after
submission; acceptance to publication is undertaken in 1.9
days (median values for papers published in this journal in
the first half of 2025).
