Deadline for manuscript  
submissions:

**closed (15 December 2017)**

### Message from the Guest Editors

Document Image Processing allows systems like OCR, writer identification, writer recognition, check processing, historical document processing, etc., to extract useful information from document images. In order to succeed, many preprocessing tasks can be required: Document skew detection and correction, slant removal, binarization and segmentation procedures, as well as other normalization tasks.

The intent of this Special Issue is to collect the experiences of leading scientists of the field, but also to be an assessment tool for people who are new to the world of document image processing. This Special Issue intends to cover the following topics, but is not limited to them:

- Document Image Analysis
- Document Understanding
- Document Analysis Systems
- Document Processing
- Camera-based Document Processing
- Document Databases and Digital Libraries
- Mining Document Image Collections
- Document Forensics
- Historical Documents
- Segmentation and Restoration
- Performance Evaluation
- Camera and Scene Text Understanding [...]

## Editor-in-Chief

**Prof. Dr. Gonzalo Pajares  
Martinsanz**

Engineering and Artificial  
Intelligence, Faculty of  
Informatics, University  
Complutense of Madrid, 28040  
Madrid, Spain

## Message from the Editor-in-Chief

The imaging term, specific with journal, is to be considered in its broadest sense. Image processing, image understanding and computer vision are all terms related to imaging acquisition, its processing and the extraction of relevant information from the scene to obtain the underlying knowledge. All tasks related to the above items are oriented toward specific applications in a broad range of areas and topics. The *Journal of Imaging* is conceived as an efficient vehicle in the scientific community for the communication and transmission of the progress and research results in the topics covered.

## Author Benefits

**Open Access:** - free for readers, with article processing charges (APC) paid by authors or their institutions.

**High visibility:** Indexed in the Emerging Sources Citation Index (ESCI - Web of Science), Inspec (IET) from Vol. 3 and in the DBLP Computer Science Bibliography. To be indexed in Scopus from Vol. 4 (2018).

**Rapid publication:** manuscripts are peer-reviewed and a first decision provided to authors approximately 22.2 days after submission; acceptance to publication is undertaken in 5.1 days (median values for papers published in this journal in the second half of 2018).
