

# Special Issue

## 2020 Selected Papers from Journal of Imaging Editorial Board Members

### Message from the Guest Editor

I am pleased to announce a new Special Issue of the *Journal of Imaging* that is quite different from our typical issues, which will mainly focus on specific topics concerning image processing and image understanding. With this Special Issue, the *Journal of Imaging* is compiling a collection of papers submitted exclusively by its Editorial Board Members (EBMs) covering any aspect of the mentioned topics, including applications at different levels. In this regard, original research articles and comprehensive review papers are welcome. The main idea behind this issue is to turn the tables and allow our readers to be the judges of our board members.

## About the Journal

### Message from the Editor-in-Chief

The imaging term, specific with journal, is to be considered in its broadest sense. Image processing, image understanding and computer vision are all terms related to imaging acquisition, its processing and the extraction of relevant information from the scene to obtain the underlying knowledge. All tasks related to the above items are oriented toward specific applications in a broad range of areas and topics. The *Journal of Imaging* is conceived as an efficient vehicle in the scientific community for the communication and transmission of the progress and research results in the topics covered.
