Development, Cornell University,  
Ithaca, NY 14850, USA

Deadline for manuscript  
submissions:

**closed (31 January 2018)**

### Message from the Guest Editor

Examples of topics that could be included in this Special Issue are the following: the potential role in solving societal problems of (a) intelligence, (b) rational thinking, (c) emotional intelligence, (d) creativity, (e) wisdom, (f) complex problem solving, (g) complex decision making, (h) mindfulness, (i) moral reasoning, and (j) common sense. Considerations of other skills or knowledge bases would also be welcome. There will be some invited submissions, but all submissions are welcome. All papers will be peer-reviewed. Papers should be roughly 20–25 pages long, double-spaced, and speak about what the role of one (or more) variables could be in solving the serious problems that the world faces. Papers should be draw on psychological theory and research, and should make specific suggestions as to how the mentioned skills and knowledge could be used to address serious problems that have, up to now, defied solution.

## Message from the Editor-in-Chief

The relatively new and ambitious *Journal of Intelligence* is devoted to the study of human intelligence. Intelligence is a fundamental core of being human, with far-ranging implications for all members of our society. Now more than ever, in a world in which most have access to the Internet, information, and misinformation, with reduced face-to-face interactions, understanding how to measure and develop human intelligence is a critical and vital mission. Human intelligence is studied from many different perspectives, for different purposes, and this journal has an open policy with respect to approaches and methodologies. We encourage submissions with the potential to innovate, show alternative perspectives, and highlight the importance of developing and measuring intelligence as well as studies on intelligence that have an impact on our lives.

## Author Benefits

**Open Access:**— free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SSCI (Web of Science), PubMed, PMC, PsycInfo, PSYINDEX, and other databases.

**Journal Rank:** JCR - Q1 (Psychology, Multidisciplinary) / CiteScore - Q1 (Education)
