

## Special Issue

# Individual Differences and Cognitive Profiles: Evidence-Based Approaches to Intelligence Assessment

### Message from the Guest Editor

Understanding individual differences in intelligence remains a central challenge for psychology, with important implications for education, clinical practice, and scientific research. This Special Issue, 'Individual Differences and Cognitive Profiles: Evidence-Based Approaches to Intelligence Assessment', seeks contributions that critically examine the scientific and applied value of cognitive profiles in intelligence assessment. We welcome empirical, theoretical, and methodological papers that address the psychometric foundations of profile interpretation, the conditions under which profiles may or may not be valid, and their implications for psychological assessment, educational interventions, and clinical decision-making. Submissions that bridge psychometric theory, empirical validation, and applied practice are especially encouraged.

## About the Journal

### Message from the Editor-in-Chief

The relatively new and ambitious *Journal of Intelligence* is devoted to the study of human intelligence. Intelligence is a fundamental core of being human, with far-ranging implications for all members of our society. Now more than ever, in a world in which most have access to the Internet, information, and misinformation, with reduced face-to-face interactions, understanding how to measure and develop human intelligence is a critical and vital mission. Human intelligence is studied from many different perspectives, for different purposes, and this journal has an open policy with respect to approaches and methodologies. We encourage submissions with the potential to innovate, show alternative perspectives, and highlight the importance of developing and measuring intelligence as well as studies on intelligence that have an impact on our lives.

### Author Benefits

#### High Visibility:

indexed within Scopus, SSCI (Web of Science), PubMed, PMC, PsycInfo, PSYINDEX, and other databases.

#### Journal Rank:

JCR - Q1 (Psychology, Multidisciplinary) / CiteScore - Q1 (Education)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 33.9 days after submission; acceptance to publication is undertaken in 5.5 days (median values for papers published in this journal in the second half of 2025).
