

Special Issue

If Intelligence Is Truly Important to Real-World Adaptation, and IQs Have Risen 30+ Points in the Past Century (Flynn Effect), then Why Are There So Many Unresolved and Dramatic Problems in the World, and What Can Be Done About It?

Message from the Guest Editor

Examples of topics that could be included in this Special Issue are the following: the potential role in solving societal problems of (a) intelligence, (b) rational thinking, (c) emotional intelligence, (d) creativity, (e) wisdom, (f) complex problem solving, (g) complex decision making, (h) mindfulness, (i) moral reasoning, and (j) common sense. Considerations of other skills or knowledge bases would also be welcome. There will be some invited submissions, but all submissions are welcome. All papers will be peer-reviewed. Papers should be roughly 20–25 pages long, double-spaced, and speak about what the role of one (or more) variables could be in solving the serious problems that the world faces. Papers should be drawn on psychological theory and research, and should make specific suggestions as to how the mentioned skills and knowledge could be used to address serious problems that have, up to now, defied solution.

About the Journal

Message from the Editor-in-Chief

The relatively new and ambitious *Journal of Intelligence* is devoted to the study of human intelligence. Intelligence is a fundamental core of being human, with far-ranging implications for all members of our society. Now more than ever, in a world in which most have access to the Internet, information, and misinformation, with reduced face-to-face interactions, understanding how to measure and develop human intelligence is a critical and vital mission. Human intelligence is studied from many different perspectives, for different purposes, and this journal has an open policy with respect to approaches and methodologies. We encourage submissions with the potential to innovate, show alternative perspectives, and highlight the importance of developing and measuring intelligence as well as studies on intelligence that have an impact on our lives.

Editor-in-Chief

Prof. Dr. Con Stough
Centre for Human Psychopharmacology, Swinburne University of
Technology, Hawthorn, VIC 3122, Australia

Author Benefits

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubMed, PMC, PsycInfo, PSYINDEX, and other databases.

Journal Rank:

JCR - Q1 (Psychology, Multidisciplinary) / CiteScore - Q1 (Education)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 30.7 days after submission; acceptance to publication is undertaken in 3.8 days (median values for papers published in this journal in the first half of 2025).
