

Special Issue

Social Intelligence in a Digital World

Message from the Guest Editor

This Special Issue related to Social Intelligence in a Digital World is therefore calling for submissions that:

- Investigate what social intelligence looks like in a digital context.
- Explore advances in the measurement of social intelligence that are facilitated by technology—particularly if those new measures are validated against traditional measures of cognitive ability, personality, and existing measures of social intelligence.
- Examine social intelligence across different modalities. For example, email, text messages, internet chats, virtual meetings, face-to-face individual meetings, and face-to-face group meetings all present different contexts that demand different sets of skills and abilities for reading the cultural cues associated with those contexts.
- Explore the relationship between social intelligence and social media use.
- Empirically probe the relationships between constructs such as social intelligence, cultural intelligence, emotional intelligence, personality, and general cognitive ability, and other related constructs.

About the Journal

Message from the Editor-in-Chief

The relatively new and ambitious *Journal of Intelligence* is devoted to the study of human intelligence. Intelligence is a fundamental core of being human, with far-ranging implications for all members of our society. Now more than ever, in a world in which most have access to the Internet, information, and misinformation, with reduced face-to-face interactions, understanding how to measure and develop human intelligence is a critical and vital mission. Human intelligence is studied from many different perspectives, for different purposes, and this journal has an open policy with respect to approaches and methodologies. We encourage submissions with the potential to innovate, show alternative perspectives, and highlight the importance of developing and measuring intelligence as well as studies on intelligence that have an impact on our lives.

Editor-in-Chief

Prof. Dr. Con Stough
Centre for Human Psychopharmacology, Swinburne University of
Technology, Hawthorn, VIC 3122, Australia

Author Benefits

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubMed, PMC, PsycInfo, PSYINDEX, and other databases.

Journal Rank:

JCR - Q1 (Psychology, Multidisciplinary) / CiteScore - Q1 (Education)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 30.7 days after submission; acceptance to publication is undertaken in 3.8 days (median values for papers published in this journal in the first half of 2025).
