

Special Issue

The Ability-Personality Integration

Message from the Guest Editors

Individual differences research focused in cognitive abilities and personality traits has been relatively successful in predicting human behavior. Very early on, interindividual difference researchers included a wide array of different constructs including personality traits and cognitive abilities. The purpose of this Special Issue is to bring these two traditions back to the discussion table and to underscore the relevance of an integrative perspective for both individual differences and developmental research. We invite papers presenting empirical studies testing models including cognitive abilities and personality traits, along with theoretical proposals based on available evidence. Psychometric, information processing, and biological perspectives are welcome.

About the Journal

Message from the Editor-in-Chief

The relatively new and ambitious *Journal of Intelligence* is devoted to the study of human intelligence. Intelligence is a fundamental core of being human, with far-ranging implications for all members of our society. Now more than ever, in a world in which most have access to the Internet, information, and misinformation, with reduced face-to-face interactions, understanding how to measure and develop human intelligence is a critical and vital mission. Human intelligence is studied from many different perspectives, for different purposes, and this journal has an open policy with respect to approaches and methodologies. We encourage submissions with the potential to innovate, show alternative perspectives, and highlight the importance of developing and measuring intelligence as well as studies on intelligence that have an impact on our lives.

Editor-in-Chief

Prof. Dr. Con Stough

Author Benefits

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubMed, PMC, PsycInfo, PSYINDEX, and other databases.

Journal Rank:

JCR - Q1 (Psychology, Multidisciplinary) / CiteScore - Q1 (Education)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 33.9 days after submission; acceptance to publication is undertaken in 5.5 days (median values for papers published in this journal in the second half of 2025).
