

Special Issue

Advances in Socio-Emotional Ability Research

Message from the Guest Editors

This Special Issue has several aims. The first goal is to link these new developments, concepts, and measures by examining their association and interplay with general mental ability or intelligence and its facets. We want to better understand the cognitive bases that socio-emotional abilities and measures draw on. A second goal is to examine how socio-emotional abilities are interrelated in order to advance theoretical development in the field. Finally, a third goal is to assess the incremental predictive validity of socio-emotional abilities beyond individual differences in intelligence in order to estimate their unique contribution to life outcomes. Under this broad theme, we invite empirical submissions that address one or more of the following topics:

- Socio-emotional abilities and their relation to intelligence and/or individual differences in basic cognitive processes;
- Interrelations among socio-emotional abilities;
- New methodologies to measure socio-emotional abilities, including new performance-based tasks or scoring approaches;
- Identification of new socio-emotional abilities;
- Predictive validity of socio-emotional abilities.

About the Journal

Message from the Editor-in-Chief

The relatively new and ambitious *Journal of Intelligence* is devoted to the study of human intelligence. Intelligence is a fundamental core of being human, with far-ranging implications for all members of our society. Now more than ever, in a world in which most have access to the Internet, information, and misinformation, with reduced face-to-face interactions, understanding how to measure and develop human intelligence is a critical and vital mission. Human intelligence is studied from many different perspectives, for different purposes, and this journal has an open policy with respect to approaches and methodologies. We encourage submissions with the potential to innovate, show alternative perspectives, and highlight the importance of developing and measuring intelligence as well as studies on intelligence that have an impact on our lives.

Editor-in-Chief

Prof. Dr. Con Stough
Centre for Human Psychopharmacology, Swinburne University of
Technology, Hawthorn, VIC 3122, Australia

Author Benefits

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubMed, PMC, PsycInfo, PSYINDEX, and other databases.

Journal Rank:

JCR - Q1 (Psychology, Multidisciplinary) / CiteScore - Q1 (Education)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 30.7 days after submission; acceptance to publication is undertaken in 3.8 days (median values for papers published in this journal in the first half of 2025).
