Message from the Guest Editor

The 34th International Technical Conference on Circuits/Systems, Computers, and Communications (ITC-CSCC 2019) will be held on 23–26 June at Jeju Shinhwa World, Republic of Korea. The conference is open to all participants who are willing to broaden their professional contacts and to discuss the topics in Circuits/Systems, Computers, and Communications. This Special Issue of the *Journal of Low Power Electronics and Applications (JLPEA)* is a collaboration between the conference and JLPEA to exploit current advances in low power electronics. Low power devices and systems play an important role in modern technology, such as internet-of-things (IoT), wearable devices, low-power high performance computing, and biomedical electronics.

Selected papers presented at the conference will be invited for publication in the Special Issue after suitable extension (at least 50%) and peer-review process. Papers focused on the following topics will be considered for publication:

- Low-power memories
- Low-power, low leakage devices
- Energy harvesting and storage devices
- Analog and digital signal processing
- Low power circuit design

an Open Access Journal by MDPI

Editor-in-Chief

Modeling, Electronics and System
Engineering, University of
Calabria, Rende (CS) 87036, Italy

Message from the Editor-in-Chief

Journal of Low Power Electronics and Applications (ISSN 2079-9268) is an open access journal which provides an advanced forum for the studies of electronics for low power applications. A special emphasize is made on ultralow power bio-medical applications. It publishes reviews, regular research papers and short communications.

Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. Full experimental and/or methodical details must be provided.

Author Benefits

Open Access:—free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: covered by Inspec (IET) and Scopus.

Rapid Publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 4.5 days (median values for papers published in this journal in the first half of 2020).
