Special Issue

Electron Devices and Solid-State Circuits (EDSSC 2025)

Message from the Guest Editors

The IEEE 2025 International Conference on Electron Devices and Solid-State Circuits (EDSSC 2025) serves as a premier forum for researchers, engineers, and practitioners to present the latest developments in electron devices, solid-state circuits, and emerging semiconductor technologies. The scope of the conference spans a wide spectrum, ranging from advanced materials and device physics to integrated circuits, systems, and heterogeneous integration. As the electronics industry continues to evolve rapidly, EDSSC 2025 emphasizes innovation in areas such as power and RF devices, MEMS, sensors, photonics, widebandgap semiconductors, and Al hardware. Selected outstanding contributions presented at EDSSC 2025 will be invited for submission to this special journal issue. Extended versions of these papers, featuring significant new results and insights, will undergo a rigorous peerreview process. We also welcome other high-quality manuscripts that align with the themes of EDSSC 2025 and advance the state of the art in electron devices and solid-state circuits.

About the Journal

Message from the Editor-in-Chief

Journal of Low Power Electronics and Applications is an open access journal which provides an advanced forum for rapid dissemination of innovative research and important results in all aspects of low power electronics and design.

It publishes reviews, regular research papers and short communications. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. The full experimental details must be provided so that the results can be reproduced.

Editor-in-Chief

Dr. Davide Bertozzi

Reader in Advanced Processing Technologies, Department of Computer Science, University of Manchester, Manchester M13 9PL, UK

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 23.4 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).

Journal Rank:

CiteScore - Q2 (Electrical and Electronic Engineering)
