# Special Issue

# Automotive Low Power Technologies

# Message from the Guest Editor

Electronic control units (ECUs) in the automotive domain are systems, which need to fulfil several requirements like real-time, safety and security and reliability. ECUs can only be deployed in cars, if they fulfil all these requirements and are certified. Current trends in the automotive domain, where advanced driver assistant systems lead in the future even to fully autonomous driving, are increasing the complexity to fulfil all the system requirements. Novel hardware architectures like multicore and many core architectures, novel design tools for designing these architectures but also to program them, novel algorithms exploiting machine learning require new concepts in automotive low power electronics. This special issue is dedicated to these new trends and how low power electronics can support them. This includes low power hardware for inter- and intra communication, providing high-speed data transfer in the car and also in car2X scenarios.

# **About the Journal**

## Message from the Editor-in-Chief

Journal of Low Power Electronics and Applications is an open access journal which provides an advanced forum for rapid dissemination of innovative research and important results in all aspects of low power electronics and design.

It publishes reviews, regular research papers and short communications. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. The full experimental details must be provided so that the results can be reproduced.

### **Editor-in-Chief**

#### Dr. Davide Bertozzi

Reader in Advanced Processing Technologies, Department of Computer Science, University of Manchester, Manchester M13 9PL, UK

### **Author Benefits**

## **High Visibility:**

indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

# **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 23.4 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).

### Journal Rank:

CiteScore - Q2 (Electrical and Electronic Engineering)
