

Special Issue

Editorial Board Members' Collection Series: Additive Manufacturing

Message from the Guest Editors

We are pleased to announce that the Special Issue "Editorial Board Members' Collection Series: Additive Manufacturing" is now compiling a collection of feature papers invited by our Editorial Board Members in this research field. We welcome contributions from all of the EBMs and their invitees.

The purpose of this Special Issue is to publish a broad-based set of papers that represent the most influential original research articles or reviews where our EBMs discuss key themes in the field of additive manufacturing. Boosted by the successes during the pandemic, additive manufacturing has emerged as a set of practical and economically relevant manufacturing technologies. Here, we use the term additive manufacturing for any of the many possible technologies and the numerous application and market areas. We expect these papers to be both widely read and highly influential with regard to future developments. All the papers in this Special Issue will be collected into a printed edition book after the deadline and will be actively promoted.

We look forward to working together to further develop this exciting field of research.

Guest Editors

About the Journal

Message from the Editor-in-Chief

Journal of Manufacturing and Materials Processing (JMMP) (ISSN 2504-4494) is a new MDPI peer-reviewed, open access venue with a focus on the scientific fundamentals and engineering methodologies of manufacturing and materials processing. We offer an online platform facilitating effective exchange of innovative scientific and engineering ideas and the dissemination of recent, original, and significant research and developmental findings. On behalf of the Editorial Board, I extend an invitation to our scientific and engineering colleagues to contribute high-quality, innovative, and ground-breaking research articles to *JMMP*.

Editor-in-Chief

Prof. Dr. Steven Y. Liang

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, CAPIus / SciFinder, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Mechanical) / CiteScore - Q2
(Mechanical Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 3.6 days (median values for papers published in this journal in the first half of 2025).
