

## Special Issue

# Selected Highlights of the 14th Molecular Cytopathology Meeting

### Message from the Guest Editors

The 14th Edition of the Molecular Cytopathology Meeting focused on the evolving role of cytopathologists in the management of small tissue samples, at the intersection of morphology and precision oncology. As cytology and small biopsies increasingly converge in workflow and diagnostic impact, the meeting explored opportunities for integration in molecular testing, reporting systems, and routine practice. Through multidisciplinary, organ-based sessions and alongside the contributions of numerous national and international experts, the program addressed current challenges and future perspectives in small-sample diagnostics, aiming to redefine the place of cytopathology in modern oncologic pathways. This Special Issue will reflect the content of the congress sessions.

## About the Journal

### Message from the Editor-in-Chief

The *Journal of Molecular Pathology* is an open access journal that was established in 2020. The journal reveals genomic secrets so that they may be brought forward to the overall community of modern physicians and scientists. We invite you to explore our latest publications and consider *JMP* for your next research submission. Together, we can drive the future of molecular pathology.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), CAPus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Health Professions (miscellaneous))
