Special Issue

Advancing Cancer Diagnosis: Integrating Molecular Pathology into Histopathology for Solid Tumors

Message from the Guest Editor

The integration of molecular pathology with histopathology is transforming the diagnosis of solid tumors, enhancing precision and paving the way for personalized treatment strategies. Molecular techniques like Next-Generation Sequencing (NGS) allow comprehensive profiling of genetic alterations, while immunohistochemistry (IHC) and multiplex immunofluorescence reveal biomarker expressions essential for therapy selection. Digital pathology and Al offer improved accuracy and efficiency in tissue analysis, while liquid biopsies enable non-invasive monitoring of tumor dynamics. This multidisciplinary approach provides a deeper understanding of tumor biology, enabling tailored interventions for improved patient outcomes.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Giancarlo Troncone

Department of Public Health, University of Naples Federico II, 80131 Naples, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Health Professions (miscellaneous))
