Message from the Guest Editors

Dear Colleagues,

This special issue introduces the latest progress in far-reaching marine aquaculture technology and equipment from the aspects of far-reaching marine aquaculture varieties, aquaculture technology, environmental control technology, aquaculture equipment, and large-scale aquaculture platform construction technology. Specifically, the content of this special issue includes far-reaching marine aquaculture varieties and their aquaculture technologies, the influence of environmental stress on aquaculture varieties in complex aquaculture scenarios, the coupling motion characteristics of tank breeding platform and tank in wave environment, and the construction technology of safe and fish-suitable structure of far-reaching sea aquaculture platform, etc. This issue focuses on the development and progress of new aquaculture technologies and equipment through the latest research on the far-reaching marine suitable varieties and aquaculture facilities. These results will lead to further research and the extension of these techniques to other areas and species of aquaculture.

Message from the Editor-in-Chief

Journal of Marine Science and Engineering (JMSE, ISSN: 2077-1312) focuses on research in the fields of Ocean Engineering, Coastal Engineering, Physical Oceanography, Geological Oceanography, Marine Biology, and Marine Environmental Science. It publishes reviews, regular research papers, and short communications, as well as Special Issues on particular subjects. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed with Scopus, SCIE (Web of Science), Ei Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean Engineering)
