Message from the Guest Editors

Dear Colleagues,

This Special Issue follows up from the successful first installment, "Hybrid Systems for Marine Energy Harvesting". Technologies to harvest marine renewable energies (MREs) are at a pre-commercial developmental stage, and significant R&D progress is still required in order to improve their competitiveness. However, hybridization has significant potential to foster synergies among the different harvesting technologies and resources. In this Special Issue, hybridization is understood in three different manners. This Special Issue will publish cutting-edge research on the development of hybrid technologies for MRE harvesting, providing a rapid turn-around time for reviewing and publishing, to disseminate articles freely for research, teaching, and reference purposes.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Journal of Marine Science and Engineering (JMSE, ISSN: 2077-1312) focuses on research in the fields of Ocean Engineering, Coastal Engineering, Physical Oceanography, Geological Oceanography, Marine Biology, and Marine Environmental Science. It publishes reviews, regular research papers, and short communications, as well as Special Issues on particular subjects. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed with Scopus, SCIE (Web of Science), Ei Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean Engineering)
