2. University of Chinese Academy of Sciences, Beijing, China

Message from the Guest Editors

Microorganisms (algae, bacteria, archaea, fungi, and viruses) drive major biogeochemical cycles (C, N, P, S, Fe, etc.) and support higher food-webs globally; they are vital components of the marine ecosystem. However, the most important characteristic of microorganisms is that they do not work alone. Their function depends on group effects. A topic of concern is the elucidation of what drives these group effects. These include biological signals, chemical signals and environmental signals. In order to better understand the role of microorganisms in the marine ecosystem, it is necessary to know their behavioral processes and regulatory mechanisms.

Deadline for manuscript submissions:

Message from the Editor-in-Chief

Journal of Marine Science and Engineering (JMSE, ISSN: 2077-1312) focuses on research in the fields of Ocean Engineering, Coastal Engineering, Physical Oceanography, Geological Oceanography, Marine Biology, and Marine Environmental Science. It publishes reviews, regular research papers, and short communications, as well as Special Issues on particular subjects. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed with Scopus, SCIE (Web of Science), Ei Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean Engineering)
