### Message from the Guest Editors

Underwater cultural heritage (UCH) is a crucial asset for the knowledge of humankind's history and traditions. It is tangible evidence of past human life that has to be protected for ensuring its accessibility to present and future generations.

The documentation, preservation, and dissemination of UCH is an open challenge that is strongly interdisciplinary because it involves collaboration among various experts from different sectors, such as archaeology, geology, biology, marine science, engineering, robotics, computer science, and numerous other disciplines.

This Special Issue intends to collect original and high-quality research articles and technical notes devoted to the knowledge of underwater materials and promote innovative methodologies, applications, and emerging technological solutions on the subject of materials that lie underwater.

## Message from the Editor-in-Chief

*Journal of Marine Science and Engineering (JMSE, ISSN: 2077-1312)* focuses on research in the fields of Ocean Engineering, Coastal Engineering, Physical Oceanography, Geological Oceanography, Marine Biology, and Marine Environmental Science. It publishes reviews, regular research papers, and short communications, as well as Special Issues on particular subjects. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed with Scopus, SCIE (Web of Science), Ei Compendex, GeoRef, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean Engineering)
