submissions:

**closed (30 December 2023)**

### Message from the Guest Editors

This Special Issue aims to present a collection of studies on biodiversity in marine benthic ecosystems of the eastern basin of the Mediterranean Sea, which is an important global biodiversity hotspot. Despite significant scientific progress in the past few decades, the eastern Mediterranean can still be considered to be underexplored and prone to the discovery of new species and assemblages. Spatio-temporal analyses of datasets on different marine benthic components and their environment are welcome and expected to expand our present knowledge. Descriptions of innovative sampling techniques targeting specific marine benthic organisms or different marine benthic habitats are strongly encouraged as there is a scarcity of standardized assessment protocols. Effects of anthropogenic pressures such as fisheries, pollution, and climate change (e.g., lessepsian migration) that may lead to a loss of biodiversity, degradation of habitats, and changes in ecosystem functioning can be examined and interpreted too.

## Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE; ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed with Scopus, SCIE (Web of Science), Ei Compendex, GeoRef, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean Engineering)
