International Hellenic University
(IHU), Thessaloniki, Greece

Deadline for manuscript
submissions:

closed (20 November 2021)

Message from the Guest Editor

Analysis and design of coastal and offshore structures is an equally demanding and challenging task. Accuracy of the calculated responses is required at a maximum level, while computational cost is very important especially when we approach the design phase and a big number of analysis cycle iterations for a large number of operational and extreme environmental conditions needs to be performed. At the same time and in a growing rate, monitoring technologies are used for both structural health as well as marine environment process observations.

In this context, this Special Issue invites original scientific contributions on topics related to numerical analysis methods and tools of offshore and coastal structures covering the broad spectrum of related analysis, monitoring technologies, and/or response diagnosis of offshore and coastal structures, monitoring technologies of marine environmental characteristics, integration and update of numerical predictions with monitoring data, real-time predictions and/or forecasting in the marine environment, and digitalization of data for offshore and coastal structures.

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE; ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed with Scopus, SCIE (Web of Science), GeoRef, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q1 (*Engineering, Marine*) / CiteScore - Q2 (*Ocean Engineering*)
