### Message from the Guest Editor

Coastal fish are important components of marine ecosystems. Furthermore, fishes are the most important economic resources for the majority of professional and recreational fisheries. The purpose of this Special Issue is to publish quality and impactful research articles with respect to several aspects of fish biology and ecology, including also commercial species, the impact of fishery on coastal fish communities, and biological invasion of non-indigenous fish species. Original and high-quality research directly related to various aspects mentioned above is encouraged.
