Orleans, LA 70148, USA

Deadline for manuscript
submissions:

closed (31 March 2020)

Message from the Guest Editors

Wetlands along coastal margins provide numerous ecosystem services, from supporting fisheries and transforming nutrients to sequestering carbon and attenuating wave action. These ecosystems are also impacted by climate change, accelerating rates of sea level rise, and human activity. As communities implement or currently rely on nature and nature-based coastal defences, tools are needed for predicting how wetlands change in response to these drivers. This special issue will focus on predictive modeling of wetland change and the data that informs these models.

We invite submissions on coastal modeling from a range of disciplines (e.g., hydrodynamics, ecology, and/or geomorphology) and techniques, as well as fieldwork and observational research that supports modeling efforts. These include research using numerical and computer-based models, experimental modeling, remote sensing, or other types of assessments in the coastal regions.

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE; ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed with Scopus, SCIE (Web of Science), GeoRef, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q1 (*Engineering, Marine*) / CiteScore - Q2 (*Ocean Engineering*)
