closed (1 October 2022)

Message from the Guest Editors

Dear Colleagues,

In the last few decades, the use of coastal areas has expanded along with the increase of potential threats of current and future coastal hazards. Many research works have been extensively carried out to develop methods for coastal response modelling and coastal hazard assessment. The purpose of this Special Issue is to publish the most exciting research with respect to the above subjects and therefore to enlarge the understanding of coastal response processes in various spatial and temporal scales spanning from short-term storm events to long-term climate change impacts.

Dr. Jeseon Yoo

Message from the Editor-in-Chief

Journal of Marine Science and Engineering (JMSE, ISSN: 2077-1312) focuses on research in the fields of Ocean Engineering, Coastal Engineering, Physical Oceanography, Geological Oceanography, Marine Biology, and Marine Environmental Science. It publishes reviews, regular research papers, and short communications, as well as Special Issues on particular subjects. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed with Scopus, SCIE (Web of Science), Ei Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean Engineering)
